

ASEAN Veterinary Student Activity on One Health

The ASEAN Veterinary Student Volunteer Project (AVVP)

Faculty of Veterinary Medicine, Kasetsart University
in collaboration with
The Charoen Pokphand Foods PCL, Thailand

Preamble

- The internationalization policy
- The collaboration between government and private sectors
- The commencement of AEC in 2015
- The lack of understanding of Veterinary Education and Profession among ASEAN Staffs and Students

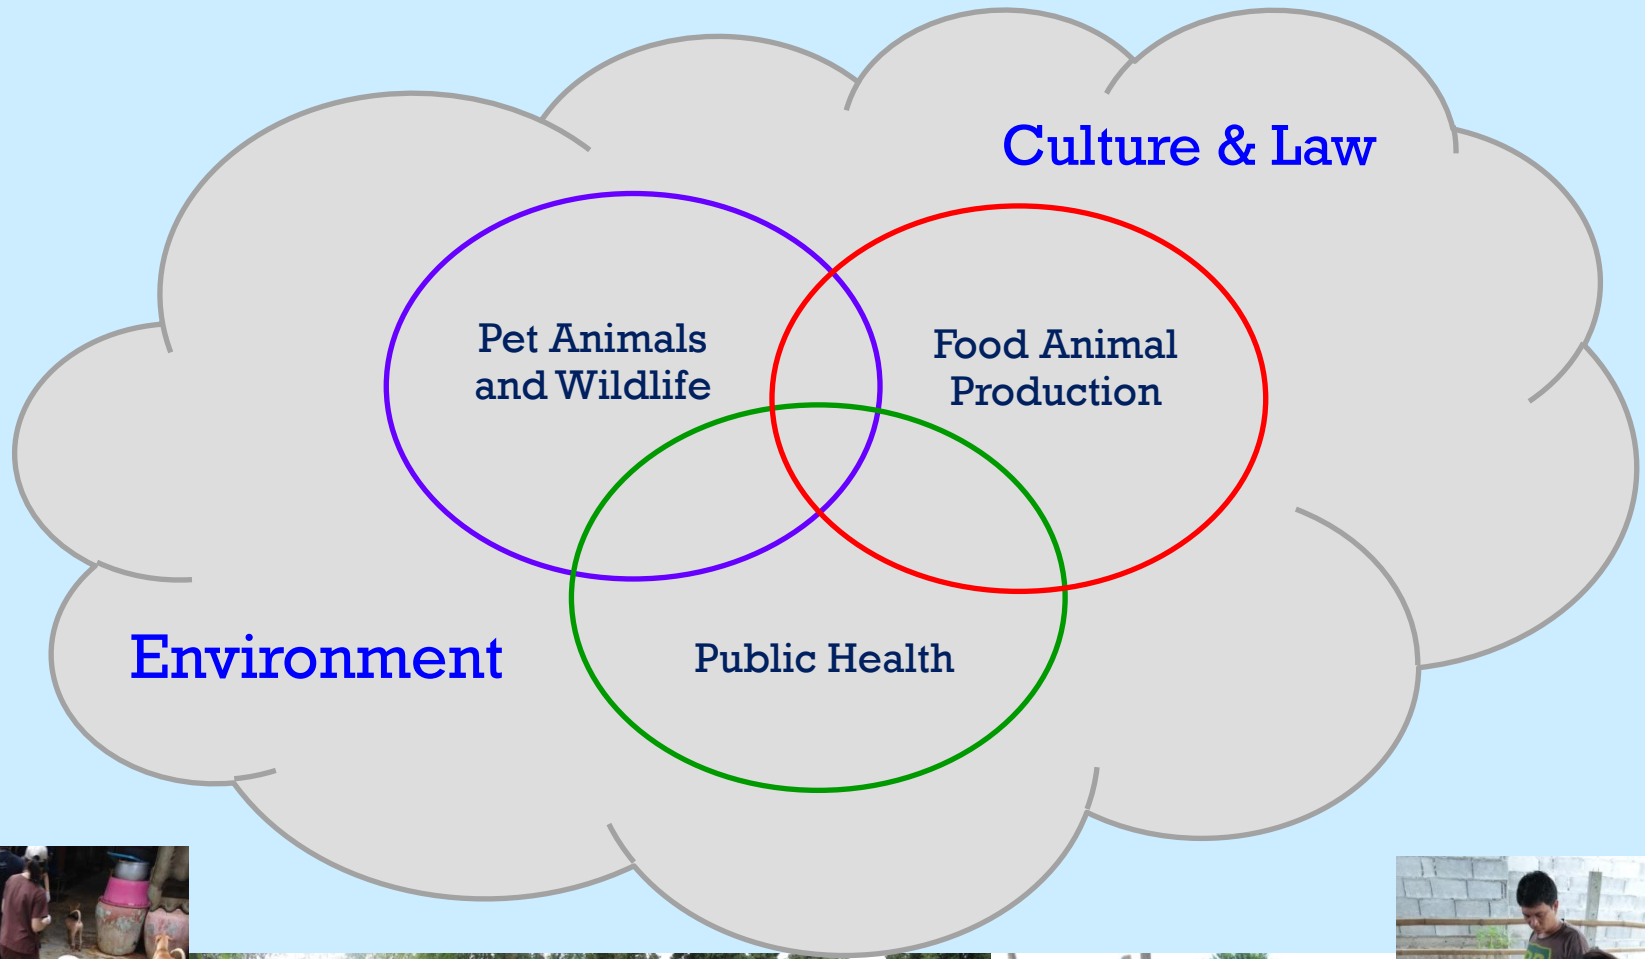

Objectives

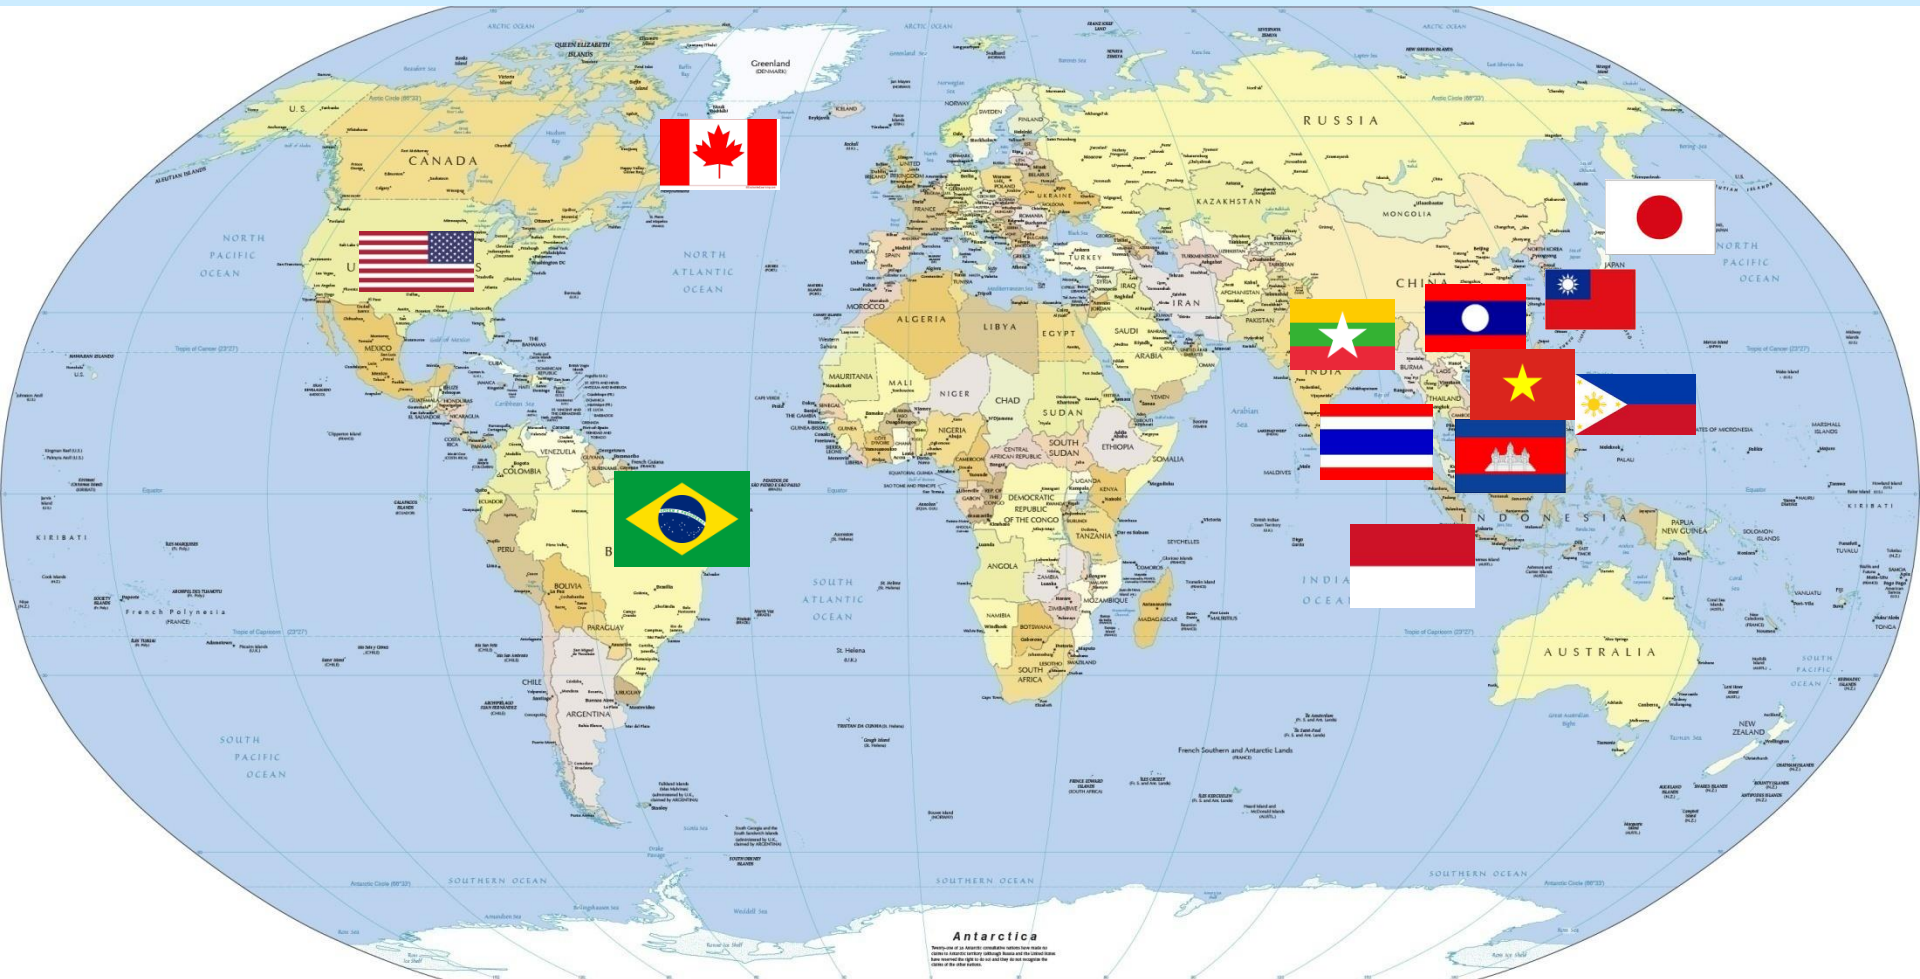

- To promote a better understanding in veterinary profession and practices among ASEAN member countries and beyond
- To foster the sense of public mind
- To propagate friendship and networking

Working Approach “One Health”

Participants

Participants (65-85)

- Year 4-6 veterinary students from ASEAN partner institutions and some selected international partner institutions (25)
- Year 4-6 veterinary students from Thai veterinary faculties (5)
- Year 4-6 KU veterinary students (20)
- KU veterinary teaching staffs and teaching staffs from co-hosting institution (15)
- Additional veterinary students from co-hosting institution during activity program in co-hosting institution country (15-20)

Project Activities

- Overview relevant scientific information
- Harmonize veterinary practical skills
- Volunteer activities and community seminar
- Community research and presentation
- Cultural experiences

Student Country Presentation

Challenging issues facing veterinary education and profession

Overview relevant scientific information

Harmonize veterinary practical skills

Charoen Pokphand Foods PCL. Food Animal Production-Corporate Scale

Volunteer Work at Animal Shelter

Volunteer Work with Rural Livestock Production

Owl House Installation

A model of natural predator as rodent control

Tree Planting *Community Forest*

Community Seminar
