HISTORY OF EVALUATION OF VETERINARY ESTABLISHMENTS IN EUROPE

- **Until 1978** every country/Establishment offered a curriculum based on tradition, state regulations, etc.
- **1978:** Publication of *Directive 78/1027/EEC* and *Decision 78/1028/EEC* establishing the *Advisory Committee on Veterinary Training (ACVT)* that requires harmonization to guarantee a comparable level of veterinary training in the 9 EU members. Define minimum standards.
- **1985-1989:** *Pilot evaluation* in 1 Establishment/ EU member.
- **1988:** Foundation of *EAEVE to develop ESEVT as a permanent system of evaluation* under the umbrella of ACVT
- **1994:** ACVT passed on the **full responsibility of ESEVT to EAEVE**
- **2000:** The *Federation of Veterinarians of Europe (FVE)* joint EAEVE on the responsibility of running the ESEVT
- **2018:** EAEVE got accreditation and full membership of ENQA and EQAR

The Association: Foundation, Mission and Objectives:

The European Association of Establishments for Veterinary Education (EAEVE) was founded in 1988 and initially based in Maisons-Alfort, France. Later, the administrative office was based in Brussels, Belgium and since 2007, the seat of EAEVE and its offices have been in Vienna, Austria.

Mission Statement:

The vision for EAEVE is to be the official accreditation authority for veterinary education establishments within Europe

The mission of the EAEVE is to evaluate, promote and further develop the quality and standard of veterinary medical establishments and their teaching within, but not limited to, the member states of the European Union (EU).

The EAEVE/FVE evaluation system gives assurance to

- the public – to know they can trust the quality of graduating veterinary surgeons and the service they deliver
- veterinary students – to know their education reaches agreed and acceptable standards
- veterinary establishments – to know that their curricula and School reaches agreed benchmarked levels

Objectives:

The primary objective is to monitor the harmonization of the minimum standards set down in the study programme for veterinary surgeons in European Union Directive 2005/36. [download](#)

This is enacted through the European System of Evaluation of Veterinary Training, which is managed by the EAEVE but with joint responsibility together with the Federation of Veterinarians of Europe (FVE). A list of Evaluated and Approved Institutions is maintained.

Other objectives are to reinforce cooperation between member establishments and to act as a forum for discussion in order to improve and harmonize veterinary education. Additional tasks are the facilitation of information exchange, staff exchange, student exchange and teaching materials exchange between members.

Standard 1: Objectives and Organisation	C	PC	NC
1.1. The Establishment must have as its main objective to provide, in agreement with the EU Directives and ESG recommendations, adequate, ethical, research-based, evidence-based veterinary training that enables the new graduate to perform as a veterinarian capable of entering all commonly recognised branches of the veterinary profession and to be aware of the importance of lifelong learning.

THE FUTURE OF ESEVT

European vs. national accreditations

Formal recognition of ESEVT by the European commission

http://ec.europa.eu/internal_market/qualifications/docs/news/20110706-evaluation-directive-200536ec_en.pdf

“8.4.4. Ex-post evaluation of training programmes

In the course of the evaluation, stakeholders widely discussed the possibility of building on an ex-post evaluation system of veterinary training programmes run by the European Association of Establishments for Veterinary Education (EAEVE) and the Federation of Veterinarians of Europe (FVE). Some stakeholders suggested granting the EAEVE evaluation a formal status, either within individual Member States, or at EU level. The ex-post evaluation could lead to a possible licensing of training programmes. However, similar ex-post evaluation programs do not exist for the other health professions (or for architects). It would be inconsistent to consider such method only for the veterinary profession but not with regard to health professions dealing with patients.”

THE FUTURE OF *ESEVT*

European vs. national accreditations

ESEVT has proven to be more focused on the acquisition and assessment of professional competencies by veterinary undergraduates and therefore better adapted to the market and societal needs than the current National Accreditation Systems that are not profession specific.
