## Interpretasi Hematologi – 18 April

**Fase recovery awal penyakit:**

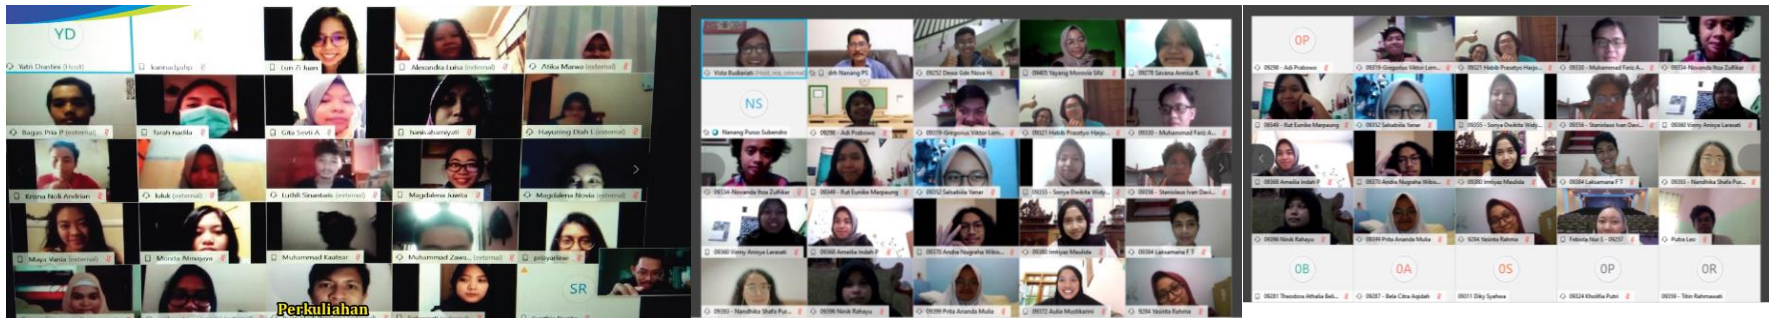

- Leukopenia disertai dengan:
  - Neutropenia → sudah meningkat daripada sebelumnya.
  - Limfopenia → sudah meningkat daripada sebelumnya.
  - Monositosis → kebutuhan untuk fagosit virus dan debris-debris.
- Adanya precursor leukosit → bukti regenerasi leukosit

**PROGNOSIS** → Baik

**Hematologi** 15%  
**WBC (x10<sup>9</sup>/l)** 12.3  
**Hemoglobin (g/dl)** 10.6  
**Platelets (x10<sup>9</sup>/l)** 332

[illegible]

A woman with dark hair and glasses is seated at a desk, looking at a laptop screen. The laptop displays a video conference with multiple participants. She is pointing at the screen with her right hand. On the desk, there is also a smartphone and a mouse. The background shows a wooden wall and some papers pinned to it.

The lecturers and the students work together to adapt with the pandemic situation and do the best for the learning process

✓ **Video production to support online course**

✓ **Health Protocol for the students who have to do their research during COVID 19 Pandemic**
